

# Web Shop GROB<sup>4</sup>Care Instruction: OCI Integration

## What is OCI and which are the advantages?

OCI (Open Catalog Interface) from GROB is an SAP standard interface. The interface serves the purpose of integrating the Web Shop into your ERP system.

- ✓ Transfer of Web Shop shopping cart to your ERP system
- Time saving thanks to process automation
- Simplification
- All prices at one view
- Current availabilities

Your process from selection of the correct spare part up to placement of your order:

## How is it possible to create a purchase request with the Web Shop GROB4Care?

The buyer would like to create a purchase request in his ERP<sup>2</sup>). He therefore selects transaction ME51N and then "catalog" GROB4Care.

Create Purchase Requisition								
Document Overview On 🕴 🛅 🖆 🚺 🚰 Personal Setting								
Purchase requisition         Source Determine           Header         Image: Source Determine         Image: Source Determine	nation			Selec	t catalog

			0					
			0					
			~		1			

Then, the Web Shop GROB<sup>4</sup>Care opens in the ERP browser. You can now fill the shopping cart of the shop ad lib and transfer all items from the shopping cart to your order request afterwards. The request can run through your internal process of approval and you order from GROB by e-mail or fax as usual.

### Integrate the Web Shop into your ERP System <sup>2</sup>) in three steps:

Requirement is the permission to customize the purchasing settings. At the beginning, it is necessary to make some settings. Therefore, please select transaction SPRO and the field <SAP Reference IMG>.

[	ç	<u>P</u> roject	<u>E</u> dit	<u>G</u> oto	<u>S</u> ettings	<u>T</u> ools	S <u>y</u> stem	<u>H</u> elp
